

Some A&M Cases Involving Embodied Intelligence and Robotics in the Past Two Years					
Date	The Acquirer and its main business		The Acquiree and its main business		Transaction method and subject matter
2025/1/27	1X Technologies	General humanoid robotics company	Kind Humanoid	A startup company specializing in bipedal humanoid robots	1X has acquired Kind Humanoid, integrating its team and related technologies into 1X.
2025/4/14	Hugging Face	Open-source AI models, datasets, and development tool platforms	Pollen Robotics	Open-source robotics company	Hugging Face has acquired Pollen Robotics, integrating its open-source model ecosystem with robotic hardware.
2025/7/8	AGIBOT	Humanoid robot manufacturer, embodied model, data acquisition and development platform	Swancor	Material research and development manufacturer	By adopting a combination of "agreement transfer and partial tender offer," the company aims to acquire control rights, with plans to hold up to approximately 66.99% of the shares, representing a value of about RMB 2.102 billion.
2025/10/8	SoftBank Group	Global technology investment group	ABB's Robotics Division	Industrial robots, cobots, mobile robots, and machine automation	SoftBank plans to acquire the entire equity stake in ABB's spin-off robotics division for \$5.375 billion, pending regulatory approval.
2025/12/11	SEVNCE	Specialized robots and intelligent inspection systems	Senton	Companies engaged in the procurement, transportation, and sale of liquefied natural gas	By adopting a combination of "agreement transfer and partial tender offer," the company aims to acquire control with a total stake of at least 44.84%, exceeding RMB 1.6 billion.
2025/12/24	UBTECH	Providers of humanoid robots, intelligent service robots, and embodied intelligence solutions	Fenglong	Manufacturers of garden machinery components, hydraulic control systems, and automotive parts	The company aims to acquire control of the listed company through a combination of agreement transfer and partial tender offer, with a planned shareholding of 43.01%, representing approximately RMB 1.665 billion.
2025/12/31	Hangzhou Kelin Electric	Listed companies specializing in power equipment condition monitoring, smart grids, and related energy technologies	Kepler	Developer of full-size humanoid robots and embodied intelligent hardware/software platforms	Hangzhou Kelin Electric has for the first time acquired a stake in Kepler; as of the disclosure in May 2026, its actual shareholding stood at 9.43%, amounting to RMB 100 million.
2026/1/6	Mobileye	Companies specializing in autonomous driving chips and autonomous driving technologies	Mentee Robotics	A humanoid robotics company that achieves vertical integration of both hardware and software.	Mobileye has signed an agreement to acquire the entire equity stake in Mentee Robotics for \$900 million, comprising approximately \$612 million in cash and the remainder primarily in shares.
2026/1/20	Serve Robotics	Autonomous delivery robots for end-point applications and robotic autonomous system platforms	Diligent Robotics	Medical service robotics companies	Serve signed a merger agreement to acquire Diligent, which will continue operating as a subsidiary, with equity consideration of \$29 million plus an additional contingent consideration of up to \$5.3 million.
2026/2/12	AVITA	Utilize digital humans, AI avatars, and generative AI to deliver interactive and service solutions.	A-Lab	Developers of Japanese humanoid robots and bionic robots	AVITA has acquired 100% of A-Lab's shares, officially entering the fields of humanoid robotics and Physical AI.
2026/2/12	Onconetix	A company listed on NASDAQ, originally focused on medical diagnostic-related businesses.	Realbotix LLC	Companies specializing in AI-driven bionic humanoid robots	Onconetix intends to acquire 100% of Realbotix LLC's equity through a stock exchange transaction.
2026/3/19	Amazon	E-commerce platforms, cloud computing solutions, logistics systems, and robotics technology platforms	RIVR	Swiss company specializing in wheeled robots for last-mile delivery services	Amazon has acquired RIVR to enhance its automation capabilities for package delivery, from transport vehicles all the way to customers' doorsteps.
2026/3/24	Amazon	E-commerce platforms, cloud computing solutions, smart hardware devices, and robotic platforms for warehousing and logistics management.	Fauna Robotics	Companies specializing in lightweight humanoid robots	Fauna has become a subsidiary of Amazon; its founders and employees have joined the Amazon ecosystem.
2026/4/15	Skild AI	Companies engaged in the development of fundamental models for general-purpose robots	Zebra Technologies' Robotics Automation Business	The original Fetch Robotics business specializes in warehouse mobile robots and dispatching platforms.	Skild AI has acquired Zebra's robotics automation business and related warehouse automation assets.
2026/5/1	Meta	Social networks, basic AI models, and computing platforms	Assured robot intelligence	A startup company specializing in intelligent robot modeling models	Upon completion of the acquisition, the ARI team was integrated into Meta's AI and robotics ecosystem.
2026/5/19	Hangzhou Kelin Electric	Listed companies specializing in power equipment monitoring, smart grid technologies, and new energy-related technologies	Kepler	Developer of humanoid robot, motion control systems, and embodied intelligence systems	The company plans to acquire an additional 41.57% equity stake, bringing its total holdings to 51% and thereby obtaining control, with the transaction cost not exceeding RMB 300 million; the combined value of both transactions shall not exceed RMB 400 million.
2026/5/19	Mistral AI	European companies specializing in large-scale foundational AI models and enterprise-level AI solutions	Emmi AI	Companies specializing in Physics AI, physical simulation, and industrial modeling solutions for engineering design and manufacturing applications.	Mistral has signed the final agreement to acquire Emmi AI, enhancing its capabilities in physical modeling and industrial engineering.
2026/6/5	Dexmal	Developers of general-purpose embodied foundation models, training infrastructure, and robotic intelligence systems	Atomix	Companies specializing in robotic logistics systems and warehouse automation solutions	Through an equity acquisition, Dexmal merged with Atomix to establish a comprehensive portfolio encompassing models, hardware, infrastructure, and application scenarios.
2026/6/24	Churchill Capital Corp XI	A U.S. special purpose acquisition company, known as a SPAC	Agility Robotics	Companies specializing in industrial and logistics humanoid robots	The two parties have signed a business merger agreement. Upon completion of the transaction, Agility plans to list under the ticker symbol "AGLT" and is expected to raise over \$620 million in funding.
2026/7/2	Estun	Companies specializing in industrial robots, motion control systems, and intelligent manufacturing solutions	Estun Codroid	Companies specializing in cobots, embodied intelligent robots, and their core components	Estun plans to acquire the remaining equity stake in Estun Codroid through its wholly-owned subsidiary, thereby obtaining an indirect 100% ownership stake upon completion of the transaction.
